Ramanlal Shorawala Public School

2016 – 2017 | Mathura, India
77.2 %

10th CBSE
Parvati Radhakishen Fomra School

2014 – 2015 | Mathura, India
10 CGPA

🧬 CODING PROFILES

LeetCode
- Solved 300+ problems.
Profile Link ⇗

CodeChef
- 3 star coder. **Profile Link** ⇗

✖ COURSEWORK

GRADUATE
Data Structures and Algorithms
Database Management System
(DBMS)
Object-Oriented Programming
(OOPs)

🧠 SKILLS

JavaScript | React.js | Recoil

HTML5 | CSS3 | Tailwind CSS

Github | Git | Data Structures

Algorithms | C++

🎸 INTERESTS

Web Development

Software Development

💼 PROFESSIONAL EXPERIENCE

Pepcoding Education Ltd.
Web Developer Internship

Sep 2021 – present
- Currently working on a product similar to google drive.
- Worked on a web scraping and automation script to help the firm download public data and provide that in an organized manner.

🗂 PROJECTS

Airbnb Clone ⇗
- Fully responsive Airbnb clone with features like date range picker calendar, choosing the number of guests, a separate search results page, and an integrated map with location markers.
- Building this clone helped me learn about maintaining states and passing props in react while avoiding the problem of prop drilling.
- I also learned about server-side and static-side rendering in next.js which helps in greatly improving the user's experience.
- Tools/Technologies - **React.js, Next.js, TailwindCSS, MapboxAPI**
- **Live Project** ⇗ **Source Code** ⇗

Jira Ticket Clone ⇗
- Implemented CRUD operations like creating new tickets with color priority, deleting and updating old tickets.
- Added different priority coloring to tickets and filter tickets based on priority.
- For the persistence of tickets added localStorage API.
- Added lock and unlock features to the tickets.
- Tools/Technologies - **JavaScript, HTML5, CSS3, TailwindCSS, WebStorage API, DOM-Manipulation.**
- **Live Project** ⇗ **Source Code** ⇗

Spotify Clone ⇗
- Fully functional and responsive clone of Spotify with features like search, play, pause, and change songs.
- Complete search functionality with data being fetched from Spotify API.
- Added User authentication using NextAuth.js.
- Implemented many concepts of react components, hooks, lifecycle methods, props, and added global state management using recoil.
- Added a custom player with controls like play, pause, and adjust the volume.
- Tools/Technologies- **React.js, Next.js, TailwindCSS, NextAuth.js, Recoil.**
- **Source Code** ⇗

My Portfolio ⇗
- It contains some small projects that I have worked on to improve my concepts of HTML5, CSS3, and JavaScript.
- Tools/Technologies- **HTML5, CSS3, JavaScript**
- **Live Project** ⇗ **Source Code** ⇗
